JANUARIO HENRIQUE

Software Engineering Student | Full Stack & Backend Developer

Kigali, Rwanda • januarioinocenciohenriques@gmail.com • github.com/Januario-Henrique • LinkedIn: januario-henrique

PROFESSIONAL SUMMARY

Software Engineering student and aspiring Full Stack & Backend Developer based in Kigali, Rwanda. Passionate about architecting scalable systems, robust REST APIs, modern web and mobile applications, and reliable database designs. Solid foundation in Object-Oriented Programming, UML system modeling, database normalization, and agile software development lifecycle.

EDUCATION

Bachelor of Science in Software Engineering — In Progress (Expected 2026/2027)

University Studies — Kigali, Rwanda

Core Coursework: Object-Oriented Analysis & Design, Data Structures & Algorithms, Database Systems, Software Architecture, System Modeling (UML, Sequence & State Diagrams), Distributed Computing, Operating Systems, Web Technologies.

TECHNICAL SKILLS & COMPETENCIES

Programming Languages: Java, TypeScript, JavaScript, SQL, HTML5, CSS3, Python (Basics)

Backend & APIs: Node.js, Express, RESTful APIs, Supabase, JWT Authentication, Spring Boot (Learning)

Frontend & Mobile: React, Next.js, React Native, Expo, Tailwind CSS, Responsive Design

Databases & Storage: PostgreSQL, MySQL, Supabase, Database Normalization (3NF), ERD Design

Software Engineering: OOP, Design Patterns (DAO, MVC), UML (Class/Sequence), BPMN, Agile, SDLC

DevOps & Tools: Git, GitHub, Postman, Vite, Vercel, Docker (Foundations), Linux / Bash

FEATURED SOFTWARE ENGINEERING PROJECTS

MotoSys — Smart Moto-Taxi Transit & Booking System

React Native • Expo • TypeScript • Supabase • PostgreSQL

- Engineered a full-featured transit platform with distinct passenger and rider interfaces for dispatching and fare estimation.
- Designed PostgreSQL database schemas with Row Level Security (RLS) and real-time transit state synchronization via Supabase.
- Implemented geolocation mapping and responsive mobile UX optimized for African urban mobility.

Student Management System — Academic Administration Platform

Node.js • Express • PostgreSQL • React • TypeScript • JWT

- Developed an institutional management platform with Role-Based Access Control (Admin, Faculty, Student).
- Architected normalized relational database schemas (3NF) managing enrollment, grading, and attendance records.
- Built secure RESTful API endpoints with input validation, token-based authentication, and audit logs.

Java Enterprise Desktop Suite (Hotel & Church Management Systems)

Java • JDBC • Hibernate ORM • MySQL • DAO Pattern • JFreeChart

- Built robust multi-tier desktop enterprise solutions adhering to the Data Access Object (DAO) pattern.
- Ensured ACID transactional consistency and relational integrity across room bookings and member records.
- Integrated automated reporting, dynamic charting (JFreeChart), and reliable database backup/restore procedures.

Up Skills Hub — Educational Portal & Internship Platform

React • TypeScript • Tailwind CSS • REST APIs

- Designed an accessible career development and internship placement hub featuring intuitive category filtering.
- Built modern responsive layouts using CSS Grid and Flexbox with zero-dependency accessible component patterns.
